

MANY ARE CALLED...

...BUT FEW ARE CHOSEN *(to make the calls!)*

A new Internet-assisted voice messaging and confirmation service (we're an ASP) is now available from the DESKTOP for all departments in your church to reach 10s or 100s in minutes. By using your CMS package such as Shelby or ACS, or just a Microsoft® Excel spreadsheet, you have the power and convenience from your desktop to manage your call list. And then, using any phone in the world, call NOTIFICATION SERVER™ to record and launch your personal messages.

All you need is **1** An email account **2** Microsoft Excel and **3** a phone. No software or equipment to install and maintain, no phone circuits to share or IT professional to lean on. NOTIFICATION SERVER™ is a 24x7 resource for you to count on.

Your call confirmations come via email, just like a certified letter — return receipt requested! You will know the disposition of every call, when received, how received, and what the response was. If there is a no answer or busy — we try multiple times. If disconnected or wrong area code, then you'll know to correct it.

Leverage the networked strength of NOTIFICATION SERVER™ to reduce your communications budget and increase your communication power!

Contact us directly or your ACS or Shelby representative to get started with an introductory program.
